

Lucia Love at NADA House, Governors Island
May 8 - August 1, 2021
Presented by JDJ, Garrison, NY

Lucia Love's visually rich paintings are loaded with references to mythology, art history, politics, and the dynamics of power. The symbolism in this recent group of works refers to the dyads of oppositional states, such as doom and hope, solidarity and isolation. They also depict flight or weightlessness in one form or another: the characters operate in a state of suspension between two disparate forces.
